In view of the amendment and remarks filed on July 18<sup>th</sup> 2005, the pending claims continue to be unpatentable as following:

***Claim Rejections - 35 USC § 112***

1. Claims 65 and 73 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The chemical formulas are unclear as m and n are not defined.

***Claim Rejections - 35 USC § 102***

2. Claims 89-94 are rejected under 35 U.S.C. 102(b) as anticipated by Miller (US 3629922).

Miller discloses an article comprised of a plastic substrate with a metal coating. The plastic substrate is pretreated with a phosphorus compound (col 2 L 62-63). Then, the treated surface is contacted with a metal salt or a metal salt complex (col 3 L 3-5). The examiner is taking the position that the phosphorus compound is equivalent to the claimed ligating chemical agent and the metal salt or metal salt complex is equivalent to the claimed catalytic material.

The treated surface becomes either conductive, such that it is readily electroplatable, or non-conductive such that the catalytic sites render the surface susceptible to further treatment by electroless plating that produces a conductive coating (col 3 L 69-col 4 L 4).

Miller's plated article is useful in printing circuits, thus it is clear that the metal is a patterned coating (col 1 L 16-19). Regarding to the substrate being an inorganic material layer, the specification clearly states it is conventional to bind a catalyzed ligating chemical agent (ie. phosphonic acids) to an inorganic oxide surface (page 16 L 18-20).

***Allowable Subject Matter***

3. Claims 57-64 and 81-88 are allowed.
4. Claims 65, 73 and their dependents would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
